My AI Assistant – Ask any question about me and it answers

Professional Summary

Computer Science student skilled in **Python, Java, SQL, DSA**, and **data analysis**, with strengths in **problem-solving** and **teamwork**. Eager to build scalable solutions and extract insights from complex data in an internship or full-time role.

Skills

Languages: Python, Java, C, JavaScript

Libraries/Frameworks: HTML5, CSS3, Bootstrap, Spring Boot, React.js, Node.js

Tools: Git, GitHub, VS Code, Hugging Face, Postman, Looker Studio, Power BI, Tableau

Databases/Backend: MySQL, SQL, MongoDB, Authentication, API Integration

Soft-Skills: Leadership, Teamwork, Communication, Critical Thinking, Adaptability, Emotional Intelligence

Work Experience

Data Analyst - *[Excelerate]*

Jul 2025 - Aug 2025

- **Processed** and **refined** real-world marketing datasets as a Data Analyst Intern using **Python, SQL, Power BI**, and **Looker Studio**, building interactive **dashboards** and **data visualizations** that supported strategic decisions—**identified** and **recommended** discontinuation of **15%** underperforming ad campaigns, resulting in a **12%** cost reduction.
- **Developed** automated workflows for **data ingestion, transformation, and insight generation**, enhancing **marketing analytics efficiency** by **30%** and improving report accuracy and delivery time by **40%**.

Projects

Finance Tracker - [GitHub](#) [↗](#)

- Developed a full-stack financial tracking web app using HTML, CSS, Bootstrap, JavaScript for the frontend, and JSP, SQL, with the Hibernate ORM Framework for robust backend data management and persistence.
- Implemented features for multi-year transaction history, categorization of income and expenses, integrated payment reminders, and an interest calculator—enabling comprehensive, real-time budget analysis and planning.

My AI Assistant - [Live Link](#) [↗](#)

- Developed my own AI-powered personal assistant that can professionally represent me. It's built with OpenAI's LLM, LangChain for workflow management, FAISS for storing and retrieving my knowledge base, and Streamlit for a clean, interactive interface. Think of it as a conversational version of my portfolio, it answers questions about me, my skills, and my work experience just like I would, making it easy for anyone to explore my background in a more dynamic way

Billing System - [GitHub](#) [↗](#)

- Engineered a secure Java-based Billing System with role-based access control, authentication, and user management—reduced unauthorized access attempts by 60% through role-tier logic (Admin, Standard, User).
- Developed an interactive GUI using JavaFX with custom CSS, session tracking, and audit logging—improving user task efficiency by 40% and providing 100% traceability of critical actions via a file-based audit framework.

Achievements & Certifications

- Led and coordinated initiatives as a Core Member of **Google Developer Student Clubs (GDSC)**, AU (2024) - organized 10+ tech events, hackathons, and bootcamps, engaging **500+** students, boosting participation by **35%**.
- Selected as a participant for **JAGRITI YATRA 2025**, a nationally recognized 15-day entrepreneurial train journey uniting **525+** changemakers from diverse sectors, fostering innovation-driven leadership and real-world impact.
- Won **1st place** at Anurag University's National Hackathon for **'CERTIFY'**, a blockchain-powered system designed to detect fake certificates and flag fraudulent job experience claims.
- Led and executed **4** Beyond Tech Events at **Microsoft Hyderabad**, engaging **300+** attendees.
- 100xDevs FullStack Web Development Certification

Education

Anurag University

BTech in Computer Science & Engineering - [CGPA: 7.83/10]

2022 – 2026
